Microfiber cloths

The smartest solution for hygienically cleanness

Design: Eva-Kristina Ruwwe | Foto: Buse-Niemann Fotografie

High-tech microfiber fleece cloth with antibacterial effect
Certified by the Hohenstein Institute for Hygiene, Environmental & Medicine.
The high-tech micro-fiber fleece cloth is a durable, abrasive and yet universal fine cloth.

The high-tech microfiber cloths are ideal for one-step cleaning process of all surfaces, fronts, objects, mirrors and glasses.

BENEFITS:

- Unbeatable value for money
- Acting permanent antibacterial
- Prevent spreading of germs, viruses and microorganisms
- Universally usage on glass, ceramic, stainless steel, chrome fittings, melamine coated surfaces, ceramic tiles and more.
- Dissolves quickly and effectively even heavy dirt (high abrasiveness)
- High tensile strength with fine material and non-irritating
- Highly resistant to chemicals, disinfectants
- Absolutely colorfast / washable up to 1,000 times
- Takes up to 400% by weight of water
- Dissolve already by light wringing 90% of the absorbed moisture
- One-stage purification process for streak-free surfaces
- Greater efficiency and significantly lower surface cleaning times
- Clean with disinfectant effect in one step
