

deleo®

Die-Kraft.com

Drain cleaner **homecare**

Quickly and reliably clears blocked pipes.

BENEFITS:

- **Effective:** deleo® HOMECARE dissolves all organic matter (e.g. hair and grease in showers and baths, kitchen waste, food scraps) in less than 20 minutes.
- **The product:** deleo® HOMECARE is a viscous product and allows dilution, so that it has a very high yield.
- Moreover, deleo® HOMECARE is an aqueous alkaline surfactant solution and therefore safe. deleo® HOMECARE does not produce vapours or develop heat during application.
- **Service:** Used regularly, deleo® HOMECARE prevents unpleasant blockages. As its yield is very high, make sure you use it in diluted form for this purpose.
- **Bottle:** The bottle is slim and therefore safe to handle. It is also transparent, so that you know exactly how much is left.
- **Environmental safety:** The product contains no VOC and is completely wastewater-neutral after 15 minutes.

Safety precautions:

Wear safety gloves, protective glasses and work clothing.

APPLICATION:

- **Pipe:** As far as possible, remove excess water from the drain and wastewater pipe.
- **Application:** Either dilute deleo® HOMECARE at a ratio of 1:5 or use undiluted and pour directly down the drain. HOMECARE is also suitable for siphons and drains.
- **Reaction time:** If used undiluted, pour down the same volume again, immediately afterwards, but this time diluted with very hot water. Wait for about 20 minutes and flush with plenty of hot water.
- **Yield:** A 1,000 ml bottle of deleo® HOMECARE can be diluted up to a yield of 5,000 ml.

CAUTION: Never use deleo® HOMECARE together with other chemicals.

Always read the safety data sheet before use.

Artikel-Nr.
708.004 bottle

Format
1.000 ml

Packungsgröße/VPE
6 x 1,000 ml bottles
